Re: Johnny G Martinez WTP - Spall Repair

Dewayne,

I would like to thank you and your crews on a great job!

From the time you and I first spoke back in January to the time your crews finished cleaning up; the highest level of professionalism was always there.

I would also like to commend everyone at your firm on how quickly everything was taken care of...a site visit, quote, contract, submittals and scheduling the work was all completed in approximately six weeks. If only all my subcontractors worked that fast maybe I wouldn't have as much gray hair as I do today....but seriously. Thanks again for all your hard work and I look forward to working with you guys again.

Best regards,

Roman Sitarz

Sr. Project Engineer
